TITLE : RESERVATION SYSTEM FOR PDC
VIDEO RECORDING
CORRESPONDING TO TIME
DIFFERENCE

ABSTRACT : PURPOSE: To simply perform PDC video recording by setting a reception country code in advance and next the reservation for timer video recording such as the starting date, starting time and the program channel of the timer video recording.

CONSTITUTION: First, a reception country in which the video cassette recorder is installed is set and stored in a time difference setting/storing means 11. Next, the contents of timer video recording i.e., the starting date and time, the ending time and the program channel, etc., of the timer video recording are set and stored in a setting/storing means 8 for the contents of timer video recording. Then, a starting time adjusting means 13 outputs adjusting data 25 for timer video recording in which the starting time and the ending time are adjusted by the time stored in time difference adjusting data 23 from among the timer video recording data 24 to a detecting means 9 detecting the start of timer video recording. When the time difference adjusting data 23 is absent, the timer video recording data 24 themselves are outputted as the adjusting data 25 for timer video recording.
